KEF-conference takes critical look at the role of research in achieving the MDGs.....	7
Introduction to the conference.....	8
Welcome address by Prof. Georg Stingl.....	8
Welcome address by Prof. Gerhard Glatzel.....	9
Part I: Policy and strategy.....	10
MDGs and research: a long way to go.....	10
MDGs and research: a global perspective.....	13
Challenges and opportunities for Southern universities and research organisations.....	24
A donor perspective – the Swedish experience.....	29
Part II: Putting theory into practice.....	34
Case studies of cooperative research partnerships contributing to the MDGs.....	34
Session 1.....	35
Session 2.....	36
Session 3.....	37
Session 4.....	38
Part III: Learning and transforming.....	39
Austrian research and MDGs in policy and practice.....	39
Government policies in research for development.....	39
Austrian research and MDGs in policy and practice.....	40
Upscale our ideas and recommendations to the European level.....	42
Summary and outcome.....	43
Extended abstracts of posters and presentations.....	44
Soil bioengineering technique – a sustainable approach infrastructure development.....	44
Yield and economics of growing <i>Eucalyptus camaldulensis</i> by smallholder farmers of Amhara Region.....	46
Collaboration in water quality research: view of an Austrian Alumni.....	50
Sustainable development on Mt. Kenya.....	51
IRESA - initiative of river ecology in Sri Lanka.....	53
Research partnership with countries of the Souths: experiences with the CORET partnership.....	54
Strengthening competitiveness through research: market-led organic agriculture in Uganda.....	55
Researches on food security in Indonesia: bringing realities to the surface.....	56
Recirculation of local organic waste in (peri-)urban agriculture (Guinea / West Africa).....	57

Working with community initiatives for the prevention and control of HIV/AIDS (Uganda).....	58
Discursive masculinities and the war against AIDS: the Kenyan experience.....	60
Development of low input systems such as organic farming (Nicaragua).....	61
Building a learning alliance in Lao PDR.....	62
Role of research in ensuring environmental sustainability: problem of water scarcity in Kenya.....	63
Never overlook women in micro business: keyword for attaining the Millennium Development Goals.....	66
Technology policy towards social inclusion.....	69
Millennium Development Goals and the role of research in river quality assessment (Nepal)	70
Impact of irrigation development on poverty and environment (Ethiopia).....	71
Market-led options to improve farmer livelihoods in Oudomxay, Laos	72
IPGL - freshwater ecosystem research & management in developing countries.....	73
Free Primary Education (FPE) in Kenya: examining the benefits, challenges and sustainability.....	75
Survey report: "A Critical Look at the Role of Research in Achieving the Millennium Development Goals"	77

APPENDIX

Recommended reading on the role of research in achieving the MDGs.....	85
List of participants.....	86
Evaluation of workshop participation.....	88
